## STREET DIRECTORY

COPYRIGHT, 1920, SAMPSON & MURDOCK CO., WORCESTER, MASS.

The Street Directory gives the location of each street, and shows what other streets or places run from It or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wish ing to know on what part of Main street No. 620 is: turn to Main street, and you find that Austin street runs from 600 right side, and Chandler street from 648, showing that No. 620 comes on the right side of Main street between Austin and Chandler.

Or, suppose that, going up Main street, you wish to take a cross street so as to call at 96 Woodland street: on examination (see Woodland) you find that 102 Woodland is at the corner of Oberlin street, so by passing from Main street through Oberlin street to Woodland, you are near the desired number, 96,

Dashes are substituted for numbers on streets that are not fully numbered.

In Worcester, as in all cities, street numbers usually begin at that end of a street which is nearest the centre of the city. Number of streets and alleys in city about 1.727.

ABBREVIATIONS .- Av. avenue: byd. beyond; ct. court: e, east; fr. from: nr. near: n. north; pl. place. s. south: sq. square: ter. terrace: w. west: wd. ward.

\*Indicates public streets. \*\*Indicate streets a part of which are public, and a part private.

Olndicates street car lines. When placed after the name of a street it shows that car lines run through that street. When placed after a street beginning, ending or intersecting, it denotes cars on such intersecting street. For example, the Connected with Alcott street shows cars on Vernon street but not on Alcott street. At Boynton street, cars run through the street, also, on connecting streets.
