A certain, safe and permanent cure for Rheumatism, Neuralgia and Salt Rheum. It is an internal remedy, driving out and entirely eradicating the disease, requiring no change in diet or business, and may be taken by children and persons of the most delicate constitutions with perfect safety.

TESTIMONIALS.

"Gardiner's Rheumatic and Neuralgic Compound" is the best medicine for the disease I ever saw. CHAS. A. SMITH, No. 1 Old State House, Boston.

After suffering with Rheumatism twenty years, and being confined to my bed several weeks last spring, I was entirely cured by the use of one bottle of "Gardiner's Rheumatic and Neuralgia Compound."—NORMAN T. AYRES, 75 Franklin Street, Boston.

Having been a constant sufferer from Neuralgia for eighteen months, and been driven by excruciating pain to the trial of numberless remedies without obtaining relief, I was induced to try "Gardiner's Rheumatic and Neuralgia Compound." I have taken but one bottle, and am entirely well.—D. D. BAXTER, Dry Goods Dealer, No. 5 Appleton Block, Lowell, Mass.

The undersigned hereby certify that they have used "Gardiner's Rheumatic and Neuralgia Compound" for the cure of Rheumatism and Neuralgia, and found, in every case, immediate and permanent relief. We have full confidence in its healing qualities, and would recommend it to all who are afflicted with these harassing diseases, as one of the safest and best medicines ever offered to the public.

No person will be likely to use any

THE CONE FURNACE

CHILSON'S

Patent Elevated

DOUBLE-OVEN COOKING-RANGE.

The great popularity of this Range, as proved by the use of some three thousand Ranges, will induce almost every person in want of a complete Cooking Apparatus to give it a decided preference over any other pattern known. It is entirely new in principle, having five claims patented for improvements not found in any other Range, and overcoming all their objections. Its unparalleled economy in the use of fuel; its quick and even-baking ovens; its patent self-regulating flues around the ovens, *without the use of dampers*; its cast flue-plates around the ovens; and its superior, fine, heavy castings, are improvements that will be appreciated by every housekeeper.

Different sizes, adapted for family or hotel use, with or without water-backs, hot-air fixtures, and hot closets, together with Furnaces, Stoves, Mantels, Grates, Registers, Ventilators, &c. &c., at

HOME COMFORT.

**ECONOMY, DURABILITY,
ELEGANCE, DESPATCH.**

JAS. MORRISON, JR., TROY, N. Y.
Patented June and September, 1860,
AND MANUFACTURED BY

**NEW FIRST-CLASS STOVE!
PERFECT IN EVERY PARTICULAR! A COMPLETE SUCCESS!!
FULL SATISFACTION GUARANTEED!!!**

Every facility that art could supply or money procure has been called into requisition to make the "HOME COMFORT" the best Stove in market.

It Excels in the following Points:

**In substantial durability in all its parts. In the nicety with which all its Joints are fitted.
And in the beauty and finish of its exterior.**

It performs all Cooking and Baking operations quickly and perfectly, with but little outlay for fuel; great economy being its chief recommendation. It is very conveniently arranged and may be attended to without soiling the finest clothing. Only the best mechanical skill is employed in its construction. Broiling is quickly and well performed, and every particle of heat which may be, is saved.

IT IS ADAPTED FOR EITHER WOOD OR COAL,
with Plain or Patent Shaking Grate, and all modern improvements.

These Stoves are made of two sizes, viz:

No. 5, Plain and Extension Top, which has three 9 inch holes and one 10 inch.

No. 6, which has three 9 inch holes and one 10½ inch, with a larger Fire Box, and Rings to reduce the holes to 8 inch.

Where a Family exceeds 10 persons, the No. 6 will be found the most economical size.

These Stoves are provided with heavy Copper Reservoirs, covered with tin, which are filled with water, and kept hot by waste heat alone. Places are also provided for the admission of Water Pipes near the fire, for Bathing and other purposes. The Top Cover, a very important addition, is useful for Baking, Heating Irons, &c., saving the heat from the top of the Stove.

The Dampers are so Accurately Fitted

that any amount of heat, to a degree, may be obtained, and Fire may be kept going day and night during the Winter with a positive saving, the coal consumed costing less generally than the kindlings used in relighting each morning. No person who has yet used the Stove has expressed dissatisfaction with any of its operations.

THESE STOVES ARE LINED

on the inside with Tin Reflectors, with back and bottom double coverings. The flues are reversible, and an arrangement is provided in the Fire Box for burning noxious gases.

THE OVEN IS VENTILATED,

and no article placed in it will flavor another. These Stoves are guaranteed perfect in every instance, and are accompanied with a full and explicit pamphlet of directions, and a synopsis printed on a large hanging card

Of all kinds and sizes ; Harrows, Cultivators, Horse Hoes, Seed Sowers,
Corn Planters, Compensating Horse Powers, Threshers, Fan Mills,
MOWING MACHINES, HORSE AND HAND RAKES,
Portable Grinding Mills, Hay, Stalk & Straw Cutters,
Store Trucks, Shovels, Spades, Forks, Hoes, Scythes, &c.

They would invite special attention to their recently improved

ONE-HORSE MOWING MACHINE,

which they believe to be just the Machine wanted by N. E. Farmers, as it is simple in construction, easy of operation, light, and cheap enough to be within the means of most farmers.

It is so constructed as to combine great strength and durability with the smallest possible weight; the cutters are so formed as to prevent all liability to clog: it may be stopped and started in wet or lodged grass, without backing; the seat is so placed that the operator can ride with ease to himself and the horse; it has a wheel and lever by which the operator can instantly raise the cutter-bar 6 or 8 inches, and by another lever, throw it in and out of gear, to pass over a stone or other obstruction, and the machine may thus be drawn to and from the field, &c.; it operates well on rough or uneven ground, where other machines cannot mow. It is entirely of iron, and it is so adjusted and guarded against accidents, that it requires but little more attention to keep it in working order, than the common scythe.

FIRE-PROOF SAFES ARE MADE IN TWO WAYS, VIZ:

With the inside Wood Casing separated from the outside Iron, around the door and door-way, by a non-conducting material, as on the

MARLAND'S PATENT,**WHICH CONSTITUTES ONE CLASS.**

With the inside Wood Casing connected to the outside Iron around the door and door-way, by Iron Plates and Bolts, as on all other manufactures,

CONSTITUTING A SECOND CLASS.

In instances where this latter class of Safes have burned, it is shown to be caused by heat being conducted into the Safe by these Iron connections, indispensable in the construction of this door and door-way; while the MARLAND'S PATENT, in actual test with this second class of Safes, has proved to be as proof against burning through the door and door-way, as if there was no opening there.

Bryant's manufacture, now extinct, 1 partially burned inside.

E. R. Morse, Dealer in Sudbury, Ct., 1 wholly burned inside.

MARLAND'S PATENT, 1 "Contents Uninjured."

For particulars, see Boston Post, December 4th and 6th, 1860,
and Boston Journal Dec. 17th, 1860.

Every Safe burned at Laconia, was burned by the heat being conducted through the door and door-way by the Iron Plates and Bolts, forming those parts connecting the outside Iron work with the inside Wood work.

The MARLAND'S PATENT, is the only Safe that is built with the Wood Casing entirely surrounded by a non-conducting material; the front, as well as the back sides, top and bottom.

MARLAND'S PATENT FIRE-PROOF SAFE.

NEW ORLEANS, Aug. 16th, 1857.

GENTLEMEN:—Our warehouse was entirely destroyed by fire on the 8th of July last, and the MARLAND PATENT SAFE we purchased of you but a short time previous, was subjected to as severe a test as is possible to imagine, no water being thrown upon it. The fire was the more intense, in consequence of the burning of over two hundred barrels of spirits; the whole mass of which, together with your Safe, and a large one from another manufacturer, being precipitated into the basement. We had many fears regarding their fates, when they fell, which were partially realized in the destruction of the large Safe, while it is with exceeding pleasure that we inform you of our good fortune, in finding the entire contents of your Safe preserved, not only from fire, but also from the slightest damage. You will please send us another Safe about one-third larger than the former one. That was No. 9 on your list.

Yours, Truly, A. F. COCHRAN & HALL.

MARLAND'S PATENT FIRE-PROOF SAFE.

Second.

LACONIA, N. H., Dec. 14th, 1860.

MESSRS. M. B. BIGELOW & ANSON HARDY: GENTLEMEN:—We, in common with many of our neighbors, were burned out at the fire which occurred in this town on the morning of 21st November last. We had one of your Marland Patent Fire-Proof Safes, which we barely had time to roll out of the building on to the side walk, and there leave it. It stood some three to four feet from the building, exposed to the flames, became heated to a white heat on one side of the Safe. On opening the Safe some three hours after the fire, we found the books and papers as perfect as when put in, with the exception of a few papers that were on the side most heated, were stained with varnish from the wood work. (Enclosed is the worst sample we have.) The varnish on the soap stone forming the door, only shew evidence of having been heated but a narrow space.

Yours, Respectfully, PITMAN & TILTON.

MARLAND'S PATENT FIRE-PROOF SAFE.

BURLINGTON, VT., April 14th, 1858.

MESSRS. M. B. BIGELOW & ANSON HARDY, Boston. GENTLEMEN:—It gives us great pleasure to inform you, that the "MARLAND PATENT SAFE," purchased by us, passed triumphantly through the great fire, which destroyed the Pioneer Mechanics Shop, on the 2d inst. The building burned was four hundred feet long, by fifty wide, four stories high, and entirely filled from base to loft with all kinds of wood-work in process of manufacture. The heat was so intense in the division in which the Safe stood, that it melted the machinery, shafting, hangers &c., into masses, so that out of some thirty tons, taken from the ruins, not half a ton is fit for use again.

The safe contained all the books and papers of the firm, and notes to the amount of \$6,000; and although it had been subject to the most intense heat, very much to our surprise, the contents were found to be uninjured. We shall take pleasure in recommending your safes to the public, as we can confidently say that the one in our possession has surpassed our most sanguine expectations.

Yours, &c., C. KILBURN & CO.

MARLAND'S PATENT FIRE-PROOF SAFE.

Drs. Hayes & Jackson, Assayers to the State of Mass., assert, "the door and door-way (the most vulnerable part of a Safe,) to be as fire-proof as the walls, and that is all that can be expected of any Safe—and secure in any fire, the intensity of which is less than sufficient to melt the mass of Iron and Stone."

A DRY SAFE.

A "Marland's Patent" Fire-Proof Safe was filled with books, papers and parchment, and kept locked for over one year, and when opened was found to be as free from dampness, as the day it was locked up.

PUBLIC SCHOOLS.

The public schools in Worcester, have long enjoyed a very high reputation for their excellence; and many of them are well deserving that reputation. They are fifty-five in number, taught by seventy-five teachers, and located in all parts of the city, to accommodate all the children within its boundaries. Those in the center and New Worcester are graded, and admission to their advantages is obtained by application to the Superintendent, at his office in City Hall. The schools are under the general charge of a Committee of twenty-four, eight being elected each year, and serving three years, whose deliberations are presided over by the Mayor. Besides the supervision of the Committee, the schools have the benefit of the entire services of the Superintendent, Rev. J. D. E. JONES, which have proved most useful and efficient, as well as economical.

The Classical and English High School is designed to give instruction in all the higher English studies, as well as in the Latin, Greek and French languages. A school is also kept during the winter months, for the benefit of lads and young men who cannot attend in summer. And

is opened during the winter, for persons of all ages, and both sexes, who are employed during the day. Domestic and other persons, here have an excellent opportunity to commence or pursue their studies under competent teachers, free of cost; and many wisely avail themselves of it.

The commencement of the School year, and the arrangement of the terms and vacations, have been recently changed, and are as follows:

The school year commences on the second Monday in May, and is divided into four terms, comprising forty-three weeks, and commencing respectively on the second Monday in May, the first Monday in September, the Monday after Thanksgiving and the last Monday in February.

The Annual Examination is made at the close of the Spring term, and all promotions are made by the Visiting Committee at that time, and at no other, except in especial cases, to be voted by the Board.

The Vacations in all the schools, except the Suburban, are as follows: six weeks preceding the first Monday in September; Thanksgiving week; one week preceding the last Monday in

February; and one week preceding the second Monday in May.

Therefore the Fall term will comprise eleven weeks; the Winter term twelve; the Spring, ten, and the Summer, ten.

Hon. A. H. Bullock having presented the city the sum of \$1000, as a fund from the income of which to present annually Medals for excellence in the High School, it has been decided to award twenty SILVER MEDALS to as many of the pupils, who shall excel in the several branches pursued in the school,—the award to be made by a Board of five Judges, to be elected annually by the School Committee, from citizens outside of their own number.

PRINTING.

The undersigned would again invite the attention of his friends and fellow citizens to his increased facilities for doing every variety of

PRINTING

that may be called for. Fine Book and Pamphlet work done in a superior manner, on nice, thick paper, or on cheaper paper, as desired; and for a lower price than the same quality work can be obtained in Boston. Cards and Bill Heads, Posters and Showbills, Circulars and Labels, Checks, Notes and Receipts, new style Cloth Direction Tags, and all kinds of

PRINTING,

required for Business, Social or Wedding purposes, promptly done, in superior style.

HENRY J. HOWLAND, 212 Main Street.

The following notice was written by J. L. CLARKE, Esq., (now of the State Auditor's Office,) and published editorially in the Worcester Transcript, some years since, and the facts there stated are still worthy of attention.

ELEGANT TYPOGRAPHY.—It seems to have been the impression in many minds, that book printing cannot be done in a superior style, except in Boston or some of the larger cities. It is altogether a mistaken opinion, as some of the most perfect and elegant book work we have ever seen is executed at the office of Henry J. Howland, of this city. We have a specimen just now before us, the pamphlet containing a recent sermon occasioned by the death of a distinguished citizen. Its typography cannot be excelled, nor can it suffer by comparison with the most elegant English and American specimens of printing. Those desiring work of this kind, are referred to Mr. Howland.
